

Royce Cunningham leads ASG Inc., a Chicago-based alliance of construction industry professionals working to link, leverage, and lead weatherization and other green energy & sustainability benefits to urban communities across the nation. Architectural Services Group, Inc.(ASG), is a network of individual businesses with over 80 years combined construction industry experience, committed to full participation for the advocacy, training, and partnerships for green jobs, careers, and enterprise in existing, developing, and future green technologies. Their principals hold active LEED BD+C accredited professional certifications (Energy & Environmental Design), as well as BPI Building Analyst and Envelope certifications (energy auditing and retrofits). ASG is proud to be a certified veteran-owned business.

Green Energy in Motion, Inc. is their wholly-owned sustainability division and are their sustainability and green subject matter experts providing education, information, and innovative design & development to urban communities from the inside-out, while promoting healthy lifestyle linkages for today's generation and beyond.

Under Mr. Cunningham's direction, ASG performed Construction Management Services for the Illinois Institute of Technology Housing Redevelopment Program and the Restoration/ Renovation of the Overton Building historic landmark. As Program Manager for the Chicago School Associates/McClier, Royce managed the Chicago Public School Capital Improvement Program's special projects. These included ADA Compliance, Health Centers, Transition Centers, Career Academies, and Science Labs, and served as Director of Real Estate. Prior to joining CSA, he was responsible for program management and construction management of McClier projects. This included the construction of the Bronzeville Military Academy, the Ella Flagg Young Elementary School addition and the Chicago Agricultural Sciences High School addition. Prior to joining McClier, Mr. Cunningham worked as lead architect for Triad Consortium Architects. He recently worked with Brown & Momen, Inc., managing CPS and U of C projects.

Mr. Cunningham's 30-year career in architectural design and construction management is approaching its sunset years. Over the more recent years, his professional interests have developed into a serious commitment to evangelize energy conservation education/awareness/outreach to the urban Chicagoland area. He looks forward to the opportunity to connect with not-for-profit organizations that appear to be on parallel missions regarding sustainability.

A 1987 graduate of the IIT School of Architecture, School of Business Management, Mr. Cunningham is LEED AP BD+C certified, BPI BA (Energy Auditor) certified, a certified member of Al Gore's Climate Reality Leadership Corp, Mr. Cunningham a veteran of the US Armed Forces.
